

Banana Circle

Earthmoving

- Mark out 2m (6ft) circle
- Excavate top soil - dish shape ridged on perimeter
- 0.5 - 1m (2-3ft) deep from hollow to rim
- Bank stones on outside of rim if you have them

Adding Organic matter

- Cover whole circle - wet paper/cardboard, banana leaves, mulch material
- Fill hollow - rough mulch, coarse twigs, hay, or any humus-creating stuff
- If available add a little - manure, ash, lime

Planting it out

With a good bucket of compost/quality soil for each planting;

- 5 - 7 dwarf bananas
- sweet potato in between & on outside of the rim
- yam & taro inside the rim
- Later - beans planted to climb papaya & bananas
- Cassava can also be planted
